EDUCATION

Northbridge Institute of Technology Jul 2024 – May 2028
Bachelor of Technology in Computer Science and Engineering; CGPA: 7.76/10 (Expected)

EXPERIENCE

Club Head Jan 2026 – Present
Campus Technology Club, Northbridge Institute of Technology

- Directed club-wide product and event operations, coordinating cross-functional teams of developers and designers.
- Drove development of a roommate-matching platform from requirements through launch, reaching 2,000+ profiles, 7,200+ unique visits, 230+ rooms, and 110+ matches.
- Managed task allocation, review cycles, and delivery timelines for a multi-member team under fixed event deadlines.
- Led delivery of a blockchain hackathon website and coordinated technical operations for the 30-hour event.

Core Member Apr 2025 – Jan 2026
Campus Technology Club, Northbridge Institute of Technology

- Owned end-to-end delivery of a university hackathon website, built from scratch for a 36-hour sold-out event hosting 200+ participants.
- Led the team behind the official campus technology club website, defining page structure, reusable components, and release milestones.
- Supported outreach operations by producing campaign assets for the Social Media & PR team.

PROJECTS

BI Platform | Python, Pandas, SQLAlchemy, MySQL, SQL, Power BI
github.com/alexmorgan-dev/bi-platform

- Engineered an end-to-end ETL pipeline in Python to extract, clean, and load an e-commerce dataset into a MySQL data warehouse.
- Modelled a star schema with a sales fact table and five dimensions to support analytical workloads.
- Optimized query performance using targeted indexes and reusable SQL views for sales, product, seller, and payment analytics.
- Authored business queries for monthly revenue, top sellers, and revenue by state, feeding Power BI dashboards.

Customer Behaviour Analysis | Python, PostgreSQL, Power BI
github.com/alexmorgan-dev/customer-behaviour-analysis

- Cleaned and engineered features on a 3,900-record dataset, imputing missing ratings with category-level medians.
- Modelled the data in PostgreSQL and answered revenue and retention questions using CTEs, window functions, and ranking queries.
- Built a Power BI dashboard with KPI cards and six slicers, surfacing subscriber-spend and discount-dependency insights.
- Translated findings into retention and pricing recommendations for high-value segments.

SmartBudget | Kotlin, Jetpack Compose, Firebase, Cloud Firestore
github.com/alexmorgan-dev/smartbudget

- Architected an Android finance app on MVVM with a repository layer isolating data sources from the UI.
- Implemented StateFlow-driven reactive state across ViewModels for lifecycle-safe, predictable updates.
- Integrated Firebase Authentication for registration, login, and password reset, with profiles in Cloud Firestore.
- Built budget creation, income and expense logging, and automatic balance computation with Navigation Compose.

GoFit | Flutter, Dart
github.com/alexmorgan-dev/gofit

- Structured a cross-platform Flutter app on a feature-first architecture separating core, feature, and shared layers.
- Built a reusable widget library and centralised style constants, eliminating duplication across screens.
- Organised modular routes and layer boundaries to support state management and backend integration.

TECHNICAL SKILLS

Languages: Python, SQL, Kotlin, Dart
Frameworks & Libraries: Pandas, NumPy, SQLAlchemy, Flutter, Jetpack Compose, Material 3
Databases & Cloud: MySQL, PostgreSQL, Firebase Authentication, Cloud Firestore
Data & Analytics: ETL Pipelines, Data Warehousing, Star Schema Modelling, Power BI, Jupyter
Developer Tools: Git, GitHub, Android Studio, VS Code, Gradle, Figma
